DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8,12-18,20-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kamarehi et al in view of Liao article 9lds item 12).

Kamarehi et al teach the claimed subject matter except for showing use of a twt helix to enhance the processing power of the microwave device. The article to Liao is applied for teaching that it is beneficial to connect a twt helix downstream from an Em device to enable higher power to be effected from the processor and in view of this teaching it would have been obvious to modify the Kamarehi et al system to feed into a twt helix, to enable more effective power conversion. Note that use of hollow coils to effect heat reduction via coolant within the coils is an obvious,

Considering the widespread use of the same in inductive plasma systems and coils. Use of specific cooling jackets, particular microwave frequencies and specific power levels for the microwave signals are choices that are well within the level of ordinary skill and choices dependent on the end use of the device and the gases used.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Alton and Bible et al are cited for disclosing twt helical coil systems of interest.

Allowable Subject Matter

Claims 9-11 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not teach the claimed shield means, absorption means and coupler comprising a coaxial cable.
